

Holiday Activities

15-06-2017

The children enjoyed painting a picture of the solar system using paint.

Dear Parents

Myself, Ms. Grace and the Foundation 1 team would like to take this opportunity to say a heartfelt farewell to all the children and parents in Foundation 1. Your children have done us extremely proud this year and we will miss them terribly, but we know that children grow up and have to move on.

We wish them all the best.

The Foundation 1 team

At home:

Continue to count numbers from 1-20 and beyond.

Continue to practice the Phonics sounds.

Read stories every day to your child over the summer.

Continue to practise writing their name.

Keep a Diary!

Why not keep a diary of all the lovely things you have done over the summer?

Take pictures, paint pictures, type up information on the computer, stick pamphlets in. There are so many ways to create a diary of your holiday.

When you return to school in September you can share your holiday experience with your new teacher and friends.

Top Tip!

Give your child enriched experiences over the summer break. There are lots of websites you can visit to get craft ideas, science experiment ideas and excursion ideas.

Pinterest is a good website to use for inspiration.
