RE: MAD SCIENCE DEMONSTRATION YEARS 5 AND 6

Dear Parents/Guardians,

We currently run a very popular Science ECA for students in Key Stage 1, and we have been looking to extend this provision to Key Stage 2. We are delighted to inform you that Mad Science, a very popular company based here in Shanghai who offers a curriculum that has been developed with NASA to promote scientific learning and practical skills are interested in working in partnership with us to offer students in Years 5 and 6 a Science BISCAP.

As BISCAP is a paid-for programme we would like to invite you to their free 'FIRE AND ICE' demonstration session so that you can experience first-hand the practical and engaging activities they will be able to offer. At the end of the session we will be asking you to indicate your interest in your child/children in Years 5 and 6 starting a BISCAP next term. Based upon the level of interest, we will decide if the BISCAP would be popular enough to be offered.

In order to start next term I'm afraid this is very short notice, and the event will take place in the Secondary Auditorium on **Wednesday the 27<sup>th</sup> November** at 4:30pm until 6:00pm at the latest.

Please sign and return the slip below as soon as possible to your child's classroom teacher if you would like to attend. We ask that all children are accompanied by an adult.

Please inform your child's classroom teacher if your attendance will impact on end of day procedures or buses.

I look forward to seeing many of you there.

Best wishes,

Helen McMullen  
Primary Science Coordinator
