

This Week in F1

18/05/2017

A look back at this week...

The Foundation 1 children really enjoyed learning about Sea Turtles this week. They got to meet some aquatic terrapins called Adrian and Andre.

Reminders

We will be having a Foundation Stage dress up party on Thursday 25 May 2017. Children may contribute a plate of food towards the party if they so wish. Please be aware that some children in our setting are allergic to the following foods: peanuts, shell fish, fish and soya.

We are still having our splash pool sessions every day except Tuesdays.

At home:

Continue to practise counting up to and beyond 10, depending on your child's ability.

Continue to develop your child's understanding of the shape names and their properties.

Continue to practise recognising and writing their name at home.

Continue to practice their phonic knowledge going over all the sounds learned to date.

The following week we will be:

- Reading 'Shark in the Dark'
https://www.youtube.com/watch?v=_D7_DLgvq7k
- 2D and 3D shapes and their properties
- Counting beyond 10
- Using technology
- Continuing to use the Beebots
- Doing creative activities to do with sea creatures

Top Tip!

Why not sit with your child and research sharks! There is plenty of information on sharks on the internet. Sharks are also on the decline and some species of sharks have dropped in number in the last five years due to shark fin fishing and being caught in nets. In Foundation 1 we are teaching the children the importance of looking after our world. All creatures should be protected even if they look mean and fierce, such as the shark. Sharks are important sea creatures as they maintain eco systems in our seas and oceans.
