

"Help Keep the Young Hearts Beating"

News Update- February 2017

Zheng Zi Hao

A successful outcome after a 10 hour surgery yesterday!!

We met this very cute 1 year old boy last week at the Provincial Hospital of Guangzhou.

His case is very serious. He was born with his heart on the right instead of the left and he has many complications. He had already received one heart surgery and now needed a second one.

His family had used all their savings on the first operation, and had managed to raise some funds towards the second surgery but there was a gap they just couldn't fill. They have 3 other children which the Mother takes care of at home. They grow some vegetables to help feed themselves and the father has employment but its not regular and is low paid.

The child will need regular check ups that have to be paid for and will require medication for the rest of his life. It is also possible he may require further surgery as he grows, so this poor family have some struggles to be faced. With the help of funds raised by the British School of Guangzhou we were very happy to support this little boy. We have just heard that he had a marathon 10 hour surgery yesterday that was successful! He is now recovering in ICU.

Thank you to all our sponsors for their help in supporting Hopeful Hearts!
