

# Parent Survey 2020

*Dear parents,*

Thank you for taking part in the parent survey earlier this year. Despite the disruption we have all suffered over the past year, we have received very positive feedback from many parents and some really constructive suggestions for how we can continue to improve our school. The results of the survey help us put together our strategic plans and ensure we listen to our parents. We value your feedback as working together is what makes Regents such a special place to be.

# Results from Each Area of the Survey

## Overview

Our students feel happy and safe at school, which is led by a quality School Principal, where students are making good progress and receiving a quality education.

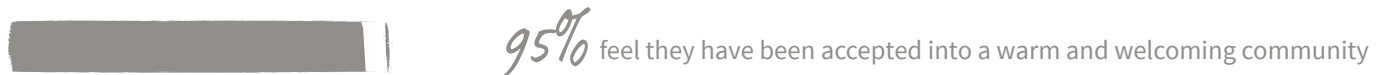

## Communication

We have also seen improvements in terms of our communication, keeping parents informed about their child's success outside of academic achievements and general school updates. This is a key area for us and you will see from our action points, this is an area we have focused on this year and will continue to work to improve still further.

## New Starters

For those families new to our community, they agree we provide a warm welcome, a well-organised admissions process, providing all the relevant information needed and living up to expectations.

## Teaching

Even more parents agreed this year that their children are taught by quality teachers and their child has a good relationship with their teacher.

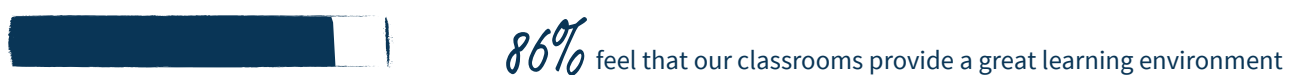

## Social and Personal Development

We saw very similar results to last year with parents agreeing that their child is developing their confidence, independence and their global awareness.

## Facilities and Services

We scored well in terms of our classroom and library and research facilities.

## Educational Opportunities

The school provides a stimulating learning environment and promotes a healthy lifestyle.

My child is just really happy at Regents.  
We see positive changes in our child like self confidence and responsibility.

(Parent)

My child enjoys Regents, the teachers know him well and he is making good progress.

(Parent)

## Actions

**1** *Improving feedback to parents* Although we continue to see improvement in feedback to parents about their child's progress we will continue to work on this. We have introduced three reports, one per term, to provide more regular feedback to parents about their children's progress and their achievements. The format has also been more standardised across the school so parents get more consistent feedback as their child progresses through the school.

**2** *How to support your child's learning at home* We will continue to develop our programme of parent workshops as well as presentations on key aspects of school life at our monthly PSG meetings. This has been a challenge over the past year with the restrictions we have faced but we are happy to have parents back on campus for these events.

The school offers a high calibre curriculum and is supported by a dedicated teaching faculty.

(Parent)

**3** *Our Philosophy and Vision* Our philosophy is all about being ambitious for our students and our teachers, providing forward thinking international education so that our students can achieve more than they thought possible. Our teacher recruitment looks for teachers who can help us to deliver this and the professional development provided by the Nord Anglia Education group means we have some of the best teachers in the world. Despite the impact this past year has had on everyone in our community, we are delighted that our turnover of teachers this summer will be very low, which reflects the dedication and commitment of the teachers we have and learning consistency for our students.
