

The Country Underwater

Hello, I am Dr. Impossible. I can be the most famous man in the world. I am in the newspaper articles, but not the way I wish because the people think I am crazy. I do not care about this because they do not know the truth. I found Atlantis. I will tell you the story about how I found Atlantis

I am on a normal trip in my U-boat, Alpha, what I do everyday. As I reach a depth of three hundred meters, I see some Atlantis symbols on a pillar. Then I drive closer and read the symbols aloud. I can understand the language of Atlantis because I researched Atlantis for two years. Soon after, as I spoke the last words, something hit my U-boat.

Next I look out and see an enormous octopus, who is compressing my boat. He causes cracks in the walls. After the shock from this huge animal, I run to my special diving suit and put it on. In the last minute I jump out of my compressed boat. I am about three hundred meters deep and my metal wet suit is pretty strong. As the octopus sees me, he chases me. I save my life by going into a small hole near by the pillar. The octopus is too huge, that he blocks my way. After a while I see some light coming trough the other side. I let the wall explode with a signal bomb because I cannot find a way to escape.

I swim out of the hole. What I see is unbelievable. I am in front of old buildings, pillars, ruins and some different types of fishes I had never seen before. After I visit the old buildings, I decide to study the other types of fishes. Finally I see a lot of old U-boats. My last chance to get out of Atlantis is to escape with one of these U-boats because my oxygen is scarce. With my last bit of strength I get into one of the U-boats and follow a sign to flee.

Not a long after I write a report about Atlantis, but nobody believes me. Today my treasures from Atlantis and the photos are the properties of my family. I teach at a university other people, how are interested in the beautiful world Atlantis.
