

Why spider
has a small
waist?

By Kayla Pulatov

It was harvest time. Spider, who was a little selfish, loved this time of year. Every village held amazing parties and spider was always invited. Unfortunately this year spider received two invitations to two wonderful parties on the same day. "Waaaaaaaaaaaaa!" cried spider. This was a ginormous problem because Spider LOVED eating, dancing, singing so he didn't want to miss out a single bit. So spider found two ropes and tied them around his waist. After that spider asked Monkey friend to put the loose end to each village.

**"Tell the strongest man in each village to tug the rope when the feast begin."
Said spider licking his juicy lips."As soon as I feel a pull I'll sprint over and eat. Then I'll dash back to the other village. That way I won't miss out ."
Well Harvest time was now. All the villagers prepared ,and soon there was dancing,singing. It just so happened that both villages eat at the same time...**

Spider ,who was running before,went to the enormous forest because it was in the middle of each village. He was aghast when he felt a pull at the same time. The strong mans didn't know why the rope was not moving but they thought that it was stuck so spider didn't come."oh no now I'm not going to a single party !"poor spider cried. He was pulled by both sides at the same time, who knew how long he was stuck there.Spiders waist got thiner and thiner while the men were pulling him.

That is why spider has a small waist. From now on spider waits for his food in his spiderweb. From now spider doesn't like going to the village.
