

BILINGUAL PRE-SCHOOL FROM 2 YEARS OLD

Our Pre-school welcomes children aged between 2 and 5 years old with a special programme designed to stimulate their development in early years. Our bilingual Pre-school programme ensures that each child's transition to school is a smooth and happy one.

Aims and objectives

- To foster exploration, curiosity and initiative
- To emphasise language development of the mother tongue as well as a second language
- To promote social interaction
- To build self-esteem and confidence in every child
- To focus on the joy of trying rather than the product of learning
- To develop a sense of autonomy
- To stimulate active expression of imagination

Each child is unique and develops at their own pace. Our mission is to stimulate their wish to grow by encouraging their success and providing a dynamic and fun environment in which they can reach their full potential and feel proud of themselves and of their achievements.

The programme

We teach in English and French. Unlike regular daycare, our programme requires regular attendance of the child throughout the week. After school, the children can attend various extracurricular activities or our daycare programme that extends until 18:45.

After 4 years in our Pre-school section, children are fully prepared to enter into our Primary school at the age of 6.
