

## Global Partnerships

Here at the British International School of Houston, we aspire to transform the lives of each of our students. Our learning programme consists of five key elements that offers a rich and balanced learning experience that meets the needs of our students, develops them both academically and holistically and prepares them fully for anything.

Through our Global Partnership at BIS Houston, we utilize a global network of world-leading specialists to create an impactful programme of transformational learning opportunities for our school community. We also pride ourselves on our relationships with our local partners here in Katy, Texas and are always looking to develop new partnerships with organizations that share our core values.

We are a school community based on our core values of Pride, Unity and Respect, a school that believes passionately about providing a safe, inspiring and enriching environment that enables everyone to flourish. We pride ourselves on placing learning at the heart of all we do and on helping all members of our community embrace learning and make the most of every day.

Links to our global partners are enriched through Nord Anglia's Global Campus. The Global Campus facilitates meaningful, relevant, challenging and exiting activities designed to motivate students and to provide them with access to world leading experts. Our Global Campus helps students explore the world, learn new skills and set their sights higher, developing a truly international perspective through outstanding online, in-school and worldwide experiences. From our in-school challenges to expeditions in Tanzania or Switzerland, we inspire your child to be ambitious in their learning.

For more information on how you can get involved, please contact our Global Partnerships Coordinator.

# Global Partnerships - MIT

At BIS Houston, MIT's philosophy is embedded within our school curriculum, allowing students to tackle real-world challenges across the subjects of science, technology, engineering, art and mathematics. BISH students develop transferable skills such as flexibility, creativity and communication. They are encouraged to experiment rather than wait for instructions, and learn that collaboration and critical thinking can solve even the trickiest problems. Through the school's MIT collaboration, students are introduced to innovative ways of learning the STEAM subjects, which encourage creativity, experimentation and how to apply their skills to real-world situations. All students have access to our dedicated maker space, allowing them to bring their ideas to life.

# Global Partnerships - UNICEF

In collaboration with UNICEF, BIS Houston students have their social consciousness raised so they care more deeply about the world and the people in it. Students research, develop and debate challenges facing our society, and take action to address them. Through special activities and events with UNICEF, students become equipped to make their voice heard on the world stage and to make a lasting, positive difference.

# Global Partnerships - Juilliard

At BIS Houston, we are passionate about the Performing Arts. All students in our school experience music, dance and drama as they form an important part of our curriculum from the age of four right through to middle school. Students follow, a curriculum guided by Juilliard, a world leader in excellence in the Performing Arts. We strongly believe all three Performing Arts subjects play a crucial role in enabling our students to develop into intelligent, confident and well-rounded global citizens.
