

3 February 2016

**RE: EYC MATHS WEEK**

Dear Parents/Guardian,

The week of the 22 February will be our Maths Week here at BISS. As well as the many exciting maths activities taking place around the school and in classrooms, we will also be raising money to support the Qing Pu Xiulong Migrant School with their maths teaching.

We would like the children to bring in as many one-Yuan coins as possible so that they can use their estimating, measuring, and counting skills to fill some big number outlines.

We will also be cooking in our classrooms, which helps us to develop everyday maths skills such as measuring out the ingredients and reading the numbers we can see in a recipe. The children will need to divide and share out their food carefully too.

Early Years will hold their own **Maths Hat Parade** on Friday 26 February. Please have a go at making a maths hat at home!

Thank you for supporting our Maths Week and for helping us to raise money for a very worthwhile cause.

Kind regards,

Andrew Foster  
Primary Maths Coordinator
