Title: **Ambition**

Ambition; what is it?
Some may say that it is improving their wit
Others may think that it is pushing their grit
But they do not realize that it has to fit
In with the expectations of others
It shouldn't be the will of the mothers
Who can decide if to interfere in another's
Daily life, routine and everyday expectations
Initiative, spirit and vigorous aspirations
Whilst the people themselves fight daily frustrations
Failures, grievances and grave accusations
Ambition doesn't have to be physical
Or a sudden overnight miracle
It could also be a state of mentality
Or an improvement in their faculty
Ambition; what is it?
Some may say that it is improving their wit
Others may think that it is pushing their grit
But they do not realize that it has to fit
In line with everyone else's feat
