

**WE LEARN BETTER,
TOGETHER.**

LEARNING FOR THE FUTURE

Learning has no limits at Nord Anglia Education. Every Nord Anglia school offers engaging learning environments to ensure your child loves coming to school. All students are a part of more than just their own school; they are involved in a virtual learning environment called Global Campus where they learn with fellow students around the world.

Global Campus is an online platform where Nord Anglia Education students connect, learn and interact with one another through collaborative projects.

Nord Anglia students are at the heart of every aspect of Global Campus. They can learn from invited experts, take part in various challenges and competitions, or collaborate with peers before and after regional festivals, sports events or global expeditions.

The finer details

- Global Campus is a personalised online learning platform
- Only students from Nord Anglia have access to the platform
- Our team of experts monitor all online activity
- The platform caters to students of all ages, and includes projects for self-directed learning as well as activities which can be undertaken with the support of teachers and parents.

“Global Campus pushes students to step further beyond themselves to connect with other young people and share their global interpretations of the world around them.”

Stacey Carmichael

Nord Anglia Education Programme Manager

International connections

- Connects students from the best schools around the world
- Provides students with an extensive range of learning opportunities 24/7
- Connects students with selected experts who are international leaders in their fields

VIRTUAL LEARNING

We believe that our most successful students are those who are able to learn independently and collaborate effectively. Global Campus offers our students the chance to develop these skill sets through online challenges and competitions.

Our online platform enhances students' learning through Nord Anglia's collaborations with world-leading organisations. Our collaboration with MIT develops our students' abilities within STEAM, while the work our students do with Juilliard encourages our students' creativity through the performing arts, and our collaboration with UNICEF empowers students to make the world a better place. At Nord Anglia we give our students a well-rounded education that is enriched by these collaborations.

“Engagement in our Global Campus projects supports students to achieve great things all over the globe, enables them to connect with and learn from each other, and inspires them to push beyond what they thought they were capable of.”

Mark Orrow-Whiting

Director of Curriculum and Student Performance

STEAM

Science, technology, engineering, arts and mathematics (STEAM) play an invaluable part in developing top academic results. This holistic approach to learning provides students with practical problem-solving skills, which help pave the way to success in an ever-changing world.

Ask the Expert with #AskMIT

Through our collaboration with MIT, students can directly engage with experts at the world's No.1 university. "Ask the Expert" encourages students to develop a deeper understanding through independent research and feedback, with the opportunity to get involved in extension activities to further explore areas of interest.

Hack the Tube

One activity students are given is the "Hack the Tube" challenge, an activity normally set for MIT's undergraduates. This project gets students to transform paper towel tubes into new products, mapping the journey from idea to final presentation.

"Imagine a world of infinite possibilities.
On Global Campus, MIT's real-world research
and STEAM projects inspire students to learn the
science, technology, engineering, art and maths
skills needed to create an exciting future."

DA d'Arbeloff

MIT Nord Anglia Collaboration

PERFORMING ARTS

We are passionate about the performing arts, including music, dance and drama. Our students around the world enrich their creative experience through Global Campus and our collaboration with The Juilliard School.

Ask the Artist with Juilliard

“Ask the Artist” is an opportunity for students to pose questions to Juilliard artists. Students can listen to and watch them perform, and then can ask them about their craft, or anything they’re curious about.

Storytelling

The international nature of our schools means that we are a melting pot of exciting stories. Our students around the world work collaboratively on Global Campus to create pieces about where they’re from. The stories are then shared across our network and students have the chance to discuss their cultural similarities and differences.

“As artists, you can make a difference to the human experience. Collaborative projects on Global Campus extend students opportunities to be the messengers of human values that bring empathy and nuance to our daily lives.”

Joseph Polisi

President Emeritus - Juilliard

LANGUAGE AND LITERATURE

We recognise the benefits of language, literacy and multiculturalism for children of every age. We believe they provide students with a global education passport, equipping them for success anywhere in the world.

Book smart

Our students read books from our carefully curated Global Library Canon of Works, made for all ages, exposing students to a range of international literature and worldviews. Students can present their views in virtual or physical book clubs, responding to questions by experts, including the authors themselves.

“Reading books from the Global Library allows us to gain a new perspective on what’s happening around the world - not just what we see before our eyes.”

Mancy

Student age 11, Hong Kong

“We are thrilled that Nord Anglia students around the world have been learning about the Sustainable Development Goals and engaging in the Global Challenge on the Global Campus, enabling them to take positive actions in their schools and communities.”

Shannon O'Shea

Team Leader: Public Partner Advocacy and Visibility Section, UNICEF

UNICEF AND GLOBAL DEVELOPMENT

Changing the World, together

Through our collaboration with UNICEF, students research, develop and debate solutions to challenges facing society. Through Global Campus, the impact of our students' ideas and initiatives is extended around the globe.

Global Challenge

Students address the Sustainable Development Goals set by the United Nations, using Global Campus to discuss initiatives to make the world a better place. Past projects range from creating a rooftop garden to fighting pollution to hosting refugee crises workshops with an international aid organisation.

Visual arts competition

To further convey their understanding of the Sustainable Development Goals, students create compelling works of art judged by a panel, including UNICEF representatives. The winning entries are exhibited at the United Nations in New York.

Entering the discussion

World Children's Day is when students are encouraged to join the discussion on issues facing children worldwide. Their problem-solving ideas are shared using photos, videos and write-ups about how they can change the world.

WHY NORD ANGLIA?

Nord Anglia Education is the world's leading school organisation. Together, we educate thousands of students at every level. We are driven by one unifying philosophy: achieve the best performance for our schools, students, teachers, staff and communities that inspire every child to achieve more than they imagined possible.

Every parent wants the best for their child — so do we. NAE delivers high quality, transformational education to ensure excellent results by going beyond traditional learning. Our global scale enables us to recruit world-leading teachers and deliver unforgettable experiences, while our engaging learning environments ensure all of our students love coming to school.
