

STEAM @ NISC

Science, Technology, Engineering, The Arts & Mathematics

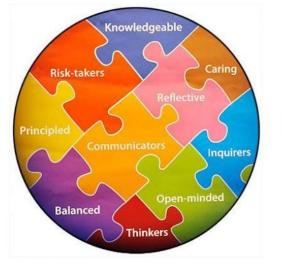

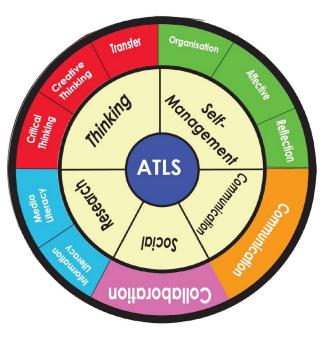

- The end point is supporting students to become good people who know how to learn and solve small and big problems:
 - Take thoughtful risks
 - Persist with problem solving
 - Embrace collaboration
 - Work through a (creative) process

Our ATL Foci: Creative Thinking & Collaboration

Question:

What do you think good Creative Thinking looks like?

What does good Collaboration look like?

Collaboration:

How can your team make sure each person is working to their strengths? What are the roles needed to make sure this group is successful? How can I help someone else in my team to achieve more?

Creative Thinking:

How do you make yourself come up with ideas? How can considering other people's perspectives help creativity? Can you teach creativity?

Question:

What do you think good Creative Thinking looks like?

What does good Collaboration look like?

We believe in the active engagement of the whole community. We believe that contemporary learning takes place when we are creative, collaborative and connected. We also believe that we have a shared humanity and we need to demonstrate compassion and ethical responsibility by enriching each other through our differences.

"Caring hearts, ambitious minds!"
