

"Help Keep the Young Hearts Beating"

News Update- June 2017

Case # 16 – Nong Xinnin

8 Months - Girl

This week we visited this little girl in our Panyu hospital in Guangzhou.

The father is living in another town due to his work and the Mother manages to work outside the home but only in a low paid job while a relative looks after the baby. She also has an older son.

The family are using all their savings to fund the surgery and are unable to borrow any more from friends or relatives. However they still don't have enough to pay for the whole surgery. They have the additional issue of the baby having Downs Syndrome, and will no doubt have to deal with costs in the future relating to looking after a child with this condition. The family are keen to give Nong Xinnin every chance in life and are desperate for some help. The baby was a pleasure to meet and was extremely interested in us!

We are very happy to be able to help this family, and wish them the very best of luck.

This surgery will be supported by funds donated by the **British School of Guangzhou**. Our enormous thanks go to them for their continued support which enables us to help so many children.

Thank you!
