

"Help Keep the Young Hearts Beating"

News Update- July 2017

Case # 20 – Fan Zhining 7 Month- Boy

We visited this little boy in the Panyu hospital in July. He had already received a heart surgery in June but his heart rate was very low and he remained in ICU with no improvement in his condition.

The hospital has recommended that he receives a pacemaker which involves a second surgery. It is hoped that in time his heart may become strong enough to beat alone, but if not, the pacemaker will require a battery change with surgery every 4-5 years at a cost of 30,000rmb each time!

The family used nearly all the money they raised on the first surgery and have very little for this second surgery, so we are very pleased to be able to support them.

He has now received the surgery and is doing well.

We are very happy to be able to help Fan Zhining and have used funds donated by **the British School of Guangzhou** to support this case. Huge thanks to BSG for their constant support that helps so many of our cases.

Thankyou!
