

Year 1 Home Learning

17-5-17

Reminders:

Please support your child by bringing in a re-usable water bottle (not a disposable, plastic bottle) to school every day.

Numeracy:

This week in Numeracy, the students have been consolidating their learning in preparation for their ongoing Numeracy Assessments. They have been revising different areas of Numeracy such as shape, number and measure through a range of revision quizzes.

Please support your child to choose a Numeracy task to complete on Mathletics: <http://www.mathletics.me/>

Literacy:

This week in Literacy, the students have taken part in a number of carousel lessons, where they have accessed different phonic activities to support their reading and writing. They will also be using a range of different superhero images to act out a scene, before writing an independent description of a superhero scene for their assessment tomorrow (Thursday).

Please support your child to complete the Big Write Home Learning in their communication book, in preparation for tomorrow's writing assessment.

IPC:

This week in IPC, the students have designed their own futuristic modes of transport. The students began the week by looking at a variety of different artist's impressions of what they think future modes of transport will look like. They used this information to design their own mode of transport and then created a model using recycled materials.

Science:

This week in Science the students have identified natural and man-made materials in their environment. They have also identified objects which are made from these materials. They then used their knowledge to answer true or false questions about man-made and natural materials.
