Nationalities 57

180 After School Activities

Trips & Community Projects 20+

25,000 Books in the Learning Centre

Our highest IB score 43

School Trips

Our classes extend beyond the school, taking students into charity and community action through exciting and engaging school trips.

Classrooms

Our context-led creative curriculum teaches many of our subjects through a themed, experience-based approach, making learning engaging and meaningful.

The HIVE

This state-of-the-art IT suite brings innovation into an alternative teaching space filled with technology and digital tools for learning.

Swimming Pool

The British International School Swim Squad, trains in our 25 metre pool and is quickly developing a strong reputation in the Shanghai Swim League.

A day in the life of a student

The Learning Centre

We have created an open and inviting environment for all age groups to allow children to browse over 23,000 books and other resource materials.

Sports Facilities

Our children enjoy our extensive sporting facilities on campus; three indoor sports halls, gymnastics hall, all-weather pitches, tennis and basketball courts and, a full size rugby/football pitch.

Performing Arts Centre

Our brand new Performing Arts Centre cultivates and inspires creativity in a fully equipped theatre, music practice rooms and state-of-the-art Music Technology Suite.

Global Classroom

Through our Global Classroom, your child will connect with students in all 31 Nord Anglia Education schools; debating and connecting with cultures of the world.

The Best British Education with an International Focus

Our Curriculum

We follow the English National Curriculum, enhanced with an international perspective recognising our students' diverse cultural and geographical experience. We offer the Cambridge Examinations (IGCSE) in Upper School, and our Senior School students study for the International Baccalaureate (IB) Diploma, both highly regarded systems of learning and examination. Our students study the High Performance Learning methodology. High Performance Learning is about removing artificial barriers to success. Research shows that, with the right mindset and with the right thinking skills, all students can achieve more than we ever thought. We make sure that every student here achieves remarkable success.

Our Promises

The British International School Shanghai, Pudong is a family school. You and your child will be welcomed as part of our school community and will enjoy a truly international 21st Century educational experience within a caring environment. Your child will love learning here.

Your child will **achieve academic excellence** with inspirational teachers who nurture and encourage every child as an individual.

Your child will **learn to lead**, developing the social and intellectual character to participate and communicate with confidence.

Your child will **make a difference** by contributing to the world around them now, establishing strong values and attributes for future success.

Our Graduates

“We believe a global education will benefit your child in many ways and to make that a reality, we have developed the Global Classroom.”

Students can be confident that their results will command respect around the world and open doors to universities and careers.

Success Stories

Samuel - Artist

Samuel is an amazing artist and he has already produced some outstanding work in Year 2. Samuel's passion for art extends beyond his wonderful accuracy and 3-D rendering to vivid and original creativity. Both his drawing and modelling skills illustrate his gift for design. Focus, determination, and pride in his work are qualities that Samuel has in great measure.

Laura - English

Laura joined us as a complete beginner to English half way through her Reception year. She attended EAL support lessons and graduated to mainstream classes at the beginning of Year 2. Her levels of spoken English, reading and writing now match those of a Year 2 child in the UK and we'll expect to see her beyond UK expectations very soon.

Aiden Wong

Now in Year 12, 16-year-old Aiden's initial results, released over the summer, included two A Grades; however a remark revealed some errors in the marking, and those two were upgraded to A* Grades.

Aiden has set his sights high for the International Baccalaureate which he commenced in August, aiming for a repeat of the perfect score. "I know for Sydney University Medical School, which is the university I want to go to, to get straight into Medicine you need a perfect 45 score in IB," he explains. He continues, "I'm aiming to get a 7 in every single subject!"

Language results

Adriano Arguedas Soley, Emiliano D'angio and Elisa Dalle Piagge on achieving the highest Languages IGCSE scores in China! These three students sat their exams this summer in French (Adriano), Spanish (Emiliano) and Italian (Elisa), and we are delighted to announce that they have each received a certificate from the examination board marking their success. They are officially the highest achievers out of all the students who sat the French, Spanish and Italian IGCSE in all the international schools in China.

Amelie & Joseph Steele

Young people are citizens of today, not citizens in waiting. Citizenship is about developing in learners the ability to take up their place in society as responsible, successful, effective and confident citizens both now and in the future.

Amelie and Joseph Steele, worked really hard over the last weekend to sort, display and sell their old toys in a garage sale. They are going to donate all of the proceeds from the sale to Heart to Heart charity where the money will go towards a heart operation. The children raised a massive 2,500RMB! We are very proud of them, what great citizenship this demonstrates.

The Magic of Drawing

At BISS we always encourage the older students to take leadership roles and to nurture the younger students. Andy, one of our Year 13 students is no exception. The Reception children were privileged to be able to observe a BISS artist who is preparing to go to a visual arts university and Andy was able to experience the joy of sharing his talent.

Drawing is invaluable for young children. It encourages them to make different kinds of lines which will eventually be used for writing, it teaches them to pay attention to details and improves their concentration.
