# The Global Campus

In School

Hi!

Worldwide

Learning has no limits at Nord Anglia Education. Your child will be part of more than just one school. They join our Global Campus, learning with fellow students around the world, from Boston to Beijing, Hong Kong to Houston and from Washington to Warsaw.

Our Global Campus will help your child explore the world, learn new skills and set their sights higher, developing a truly international perspective through outstanding online, in school and worldwide experiences.

Global Campus **online** provides a learning environment where students can create content, work with invited experts and debate with others.

Global Campus **in school** provides activities, challenges and competitions on which students can collaborate in teams to create innovative solutions to real problems.

Global Campus **worldwide** events bring students from across the world to work together on service, leadership or personal adventure experiences.

From online debates and challenges, to expeditions to the savannah of Tanzania or performing in our Global Orchestra in New York, we inspire your child to be ambitious in their learning.

## How will my child benefit?

Our Global Campus extends your child's learning beyond the classroom and the school day. Your child can participate in a wide variety of activities designed by educational experts and teachers to broaden their knowledge and nurture transferable skills valuable in school, university and the workplace. The Global Campus is based on six principles to support your child's academic, social and personal success:

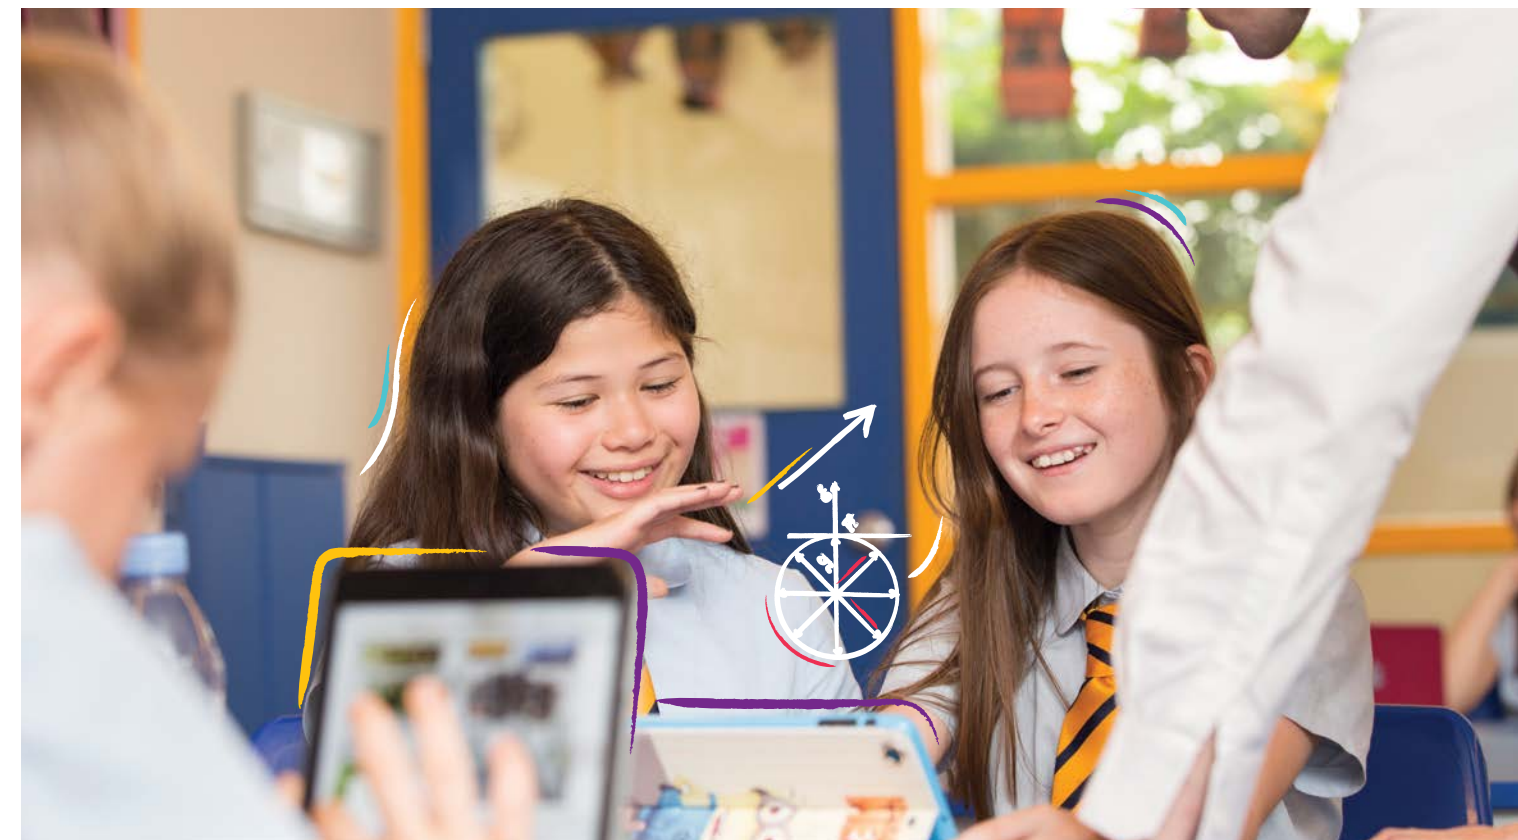

- **Collaboration:** Students are encouraged to work with each other using activities, which make collaboration essential but also promote problem-solving and creativity.
- **Internationalism:** students are encouraged to see themselves as active members of a global community with diverse perspectives and are challenged to question their own assumptions.
- **Student Leadership:** students are given opportunities to lead groups of older and younger students in our online, in-school and worldwide activities.
- **Extended learning:** activities are designed to supplement the curriculum and widens students' intellectual horizons through new experiences and a deeper engagement with areas of interest.
- **Flexible and independent learning:** Students are empowered to customise their learning, supporting the development of self-reliance, persistence, motivation and creativity.
- **Expertise development:** students have the opportunity to work with selected experts, which is not only highly motivating but also gives them an insight into what it takes to become expert in a particular field.

# ONLINE

The Global Campus Online enables your child to learn virtually anywhere. Students lead their own learning in a secure and moderated online environment only accessible by other Nord Anglia students and monitored by our team.

Your child will learn with 34,000 students and selected experts around the world through access to a wide variety of courses, information and challenges tailored to their age group. Our team of educational experts and teachers have designed the Global Campus Online to complement the curriculum and extend your child's learning.

**“Your child will learn with 34,000 students and selected experts around the world.”**

## Enhancing The Curriculum

Global Campus Online supports your child's learning in a number of key curriculum areas – Arts, English, Humanities, World Languages, Sport and Health, and Science, Technology and Maths. The content has also been designed to nurture key transferable skills and help students gain the confidence to take the initiative, create content, challenge themselves and lead.

Working with students from around the world in this way will help your child develop a global perspective. Your child will encounter diverse viewpoints on real world issues. They will be encouraged to think critically, challenge prevailing attitudes and presumptions and engage with new ideas to develop creative solutions.

Visit <http://globalcampus.nae.school/> to find out more.

*"We can communicate ideas and concepts and develop them further with help from other members of the Nord Anglia Community."*

# IN SCHOOL

Your child's school is a vital part of our Global Campus. Through lessons, beyond the classroom, after school activities and worldwide challenges, our teachers nurture language skills, cultural literacy and global citizenship to prepare your child to succeed in our globalised world.

*"It was a really fun opportunity to collaborate with all year groups on a common cause."*

From enhancing internationally-recognised curricula, to trips, visits and activities which are designed to embrace different cultures, languages and environments, your child's learning in school is designed to help them develop knowledge, skills and a global perspective which will prepare him or her to succeed anywhere in the world.

We also offer global activities, challenges and competitions where your child will work with fellow students of all ages in their school to create innovative solutions to a wide variety of real world situations. Working with world leading partners, such as Oxfam and Imperial College London, students are set an interactive challenge and then take responsibility to manage the project from start to finish.

## Enhancing The Curriculum

We recognise the benefits of multiculturalism and multilingualism for children of every age. We believe that they provide your child with a global education passport, equipping them to study anywhere in the world. Our schools offer rigorous, internationally-recognised curricula and qualifications including the English National Curriculum and International Baccalaureate, in addition to a variety of foreign language options. Each school also adapts the curricula to embrace local culture and conditions. For example, our schools in China provide opportunities for students to learn Mandarin and understand the Chinese culture as a part of their studies.

**“We recognise the benefits of multiculturalism and multilingualism for children of every age.”**

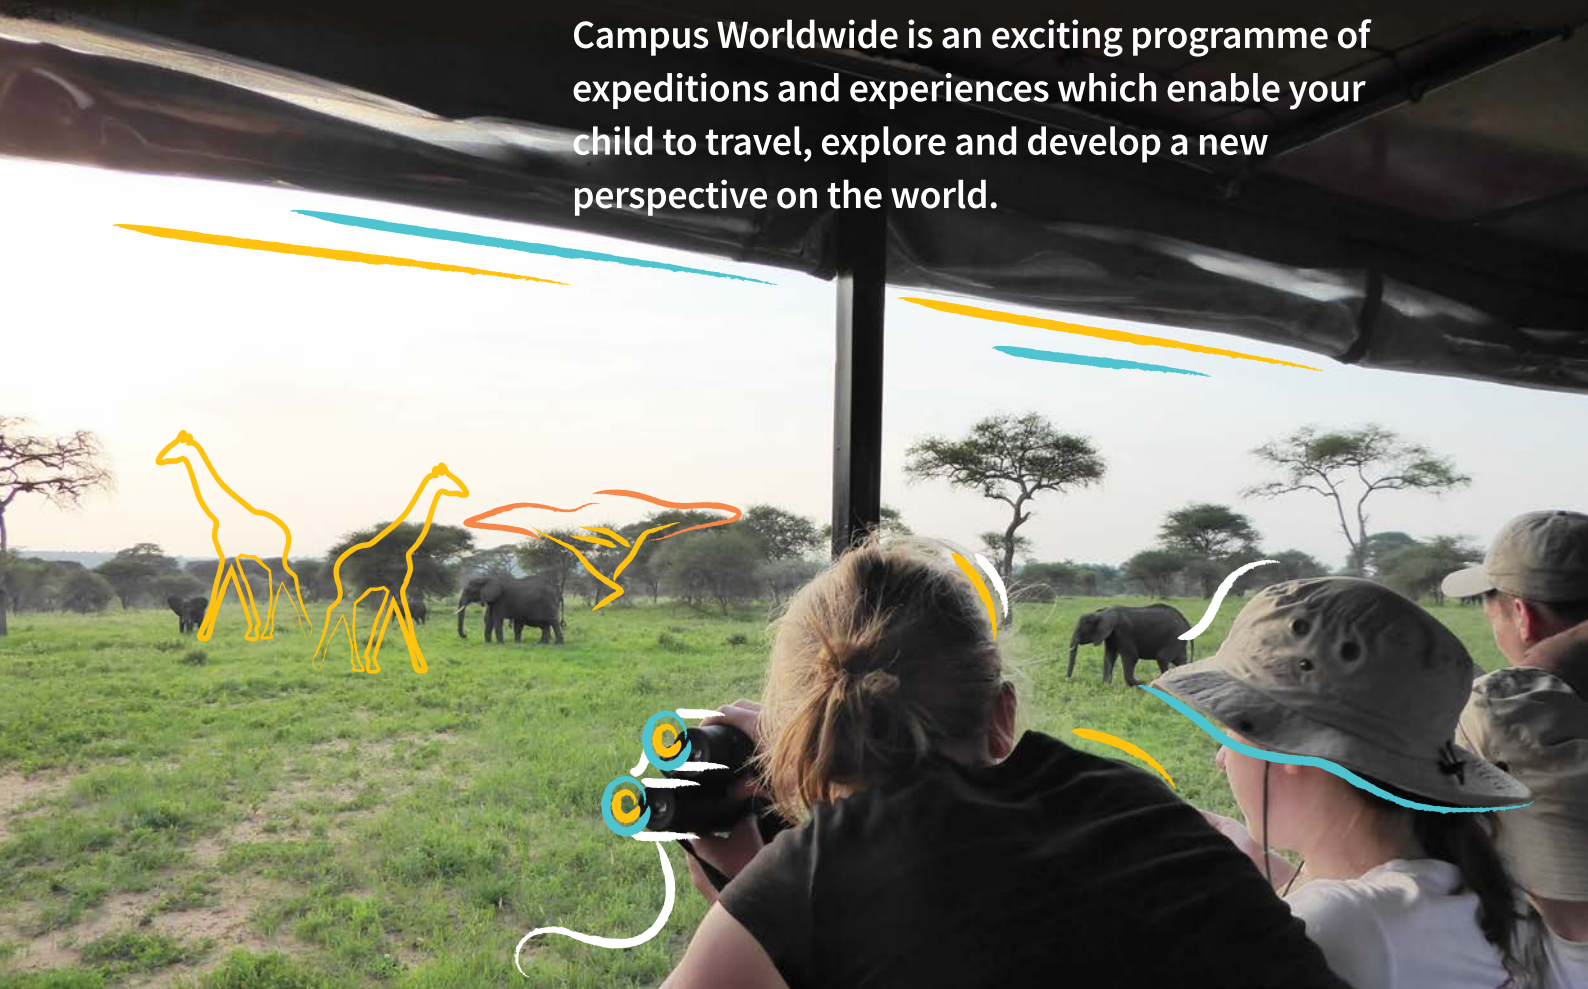

## Global Challenges

Each year, we challenge students to work together as a whole school in Global Challenges – collaborative activities focussed on interactive learning. This year, our Global Challenge is focussed on STEAM – science, technology, engineering, arts and maths. We are working with the Cambridge Science Festival, whose founders include MIT and Harvard, to challenge our students to create a chain reaction machine – a invention that performs an ordinary task in an extraordinary way. Although supported by a teacher, this challenge encourages our students to lead their own learning. Students of all ages throughout the school will work together to decide what task to complete and then design, build and test their machine before presenting it through a variety of multi-media channels. This activity not only stretches our students' imaginations, but also develops their hands-on problem solving, presentation and evaluation skills.

# WORLDWIDE

At Nord Anglia Education, we believe that learning should not be confined to the classroom. Global Campus Worldwide is an exciting programme of expeditions and experiences which enable your child to travel, explore and develop a new perspective on the world.

## Term Time Expedition Programme

Nord Anglia students of all ages participate in our Global Campus Worldwide expedition programme, developing a wide range of skills through term time experiences. Our youngest students begin with mini-adventures in their own backyard. As they get older, students travel further from home, take part in more challenging activities and collaborate with fellow students from other Nord Anglia schools.

Our students' expeditionary learning starts in the Global Campus Online. Your child will learn more about the experience, participate in planning and preparation activities and meet other Nord Anglia students in the build up to the expedition, before sharing their experiences whilst away and on their return home.

Whether based locally or at one of Nord Anglia Education's expedition bases, our expeditions are designed to broaden students' horizons, take them away from the beaten track and open their eyes to the world around them, its cultures, people and their place within it.

"All students should have a chance to experience this!"

Year 10 Student, Boston

## Local Expeditions

Each of our schools offer students opportunities to explore areas of outstanding natural beauty, understand new cultures and peoples, and support local communities without travelling too far from home. Students in Beijing travel and camp on the Great Wall of China, while students from Prague explore Krkonose mountains located in the north of the Czech Republic.

## Regional Expeditions

Schools in each of our five regions around the world, work together to create new experiences and challenges for students to learn together. Students in China have the opportunity to participate in a 5-day jungle trek in Southern China, which includes overnight stays in self-made canopy tents hung between bamboo.

## Global Expeditions

### Citizenship Expedition – Arusha, Tanzania

From our camp at the base of Mount Meru, your child will participate in a highly rewarding programme of service work for the local community.

After a day of cultural immersion, students will participate in local sustainable development projects such as working in local primary schools and children's centres to construction programmes in local villages. Students then have the opportunity to go on an educational Safari through the Tarangire National Park, learning about the region's diverse flora and fauna.

In the run up to the expedition, our students are responsible for fundraising for the service work they carry out on their expedition, giving them ownership of the project as well as developing money management skills.

This is a truly rewarding opportunity - our students to make a significant impact on improving the lives of others while strengthening their own personal leadership, flexible thinking and collaboration and teamwork skills.

### Personal Challenge Expedition – Les Martinets, Switzerland

Our camp in the Swiss Alps, provides a remarkable backdrop for challenge and adventure.

This expedition is about students setting their own personal targets and milestones and achieving them. Students will be encouraged to take calculated risks, in a safe environment, and persevere when challenges are difficult. They will learn to lead others as well as be an active part of a group.

On their first day, your child will learn skills like map reading, orienteering, and cooking to master the challenging terrain. They then take a 2-day hike into the Swiss mountains, carrying their own equipment, and staying in local mountain huts at night – preparing their own food as they go. Before departing the Alps, students are also introduced to the Swiss cheese and chocolate culture in a day trip to local cheese and chocolate manufacturers.

**Health and safety** – All of our expeditions are designed with age-specific activities and are organised to very high standards with appropriate risk assessments, trained staff and robust procedures in place to ensure that your child can experience expeditions confidently and safely.

# WORLDWIDE

The end of the school year doesn't have to be the end of your child's learning. Through our Global Campus, Nord Anglia schools around the world offer a wide variety of optional summer programmes to inspire, challenge and excite your child.

## Summer Arts with Juilliard

Is your child a budding musician, dancer or actor? Our performing arts summer programme in collaboration with the world-renowned Juilliard School is the perfect opportunity for every child.

The two-week immersive performing arts programme will be held at Collège du Léman, our prestigious boarding school situated on the shores of Lake Geneva, Switzerland. Your child will be inspired to explore and cultivate their creative talent through a unique programme designed by The Juilliard School and taught by Juilliard-affiliated artists.

Students from all over the world will choose a focus of music (instrumental or vocal), dance, or drama, culminating in a final performance to celebrate what they've learned and created over the two week experience. During the programme, your child will be encouraged to grow as an artist and will be surrounded by students who share their enthusiasm for the performing arts.

In addition to the performing arts programme, your child will also have the opportunity to participate in variety of activities and excursions such as visits to the Montreux Jazz festival.

<b>Cost:</b>	US\$ 6,765 plus flights*

*\* (A discount will be available for Nord Anglia Education families)*

## Optional Summer Schools

### Nord Anglia Summer Leadership Academy

A unique opportunity for your child to discuss and debate issues affecting our world today hosted in a global centre of academic excellence – the University of Oxford.

Your child will follow a stimulating programme of lectures, debates and excursions designed to build their understanding of current political issues as well as nurture transferable skills such as leadership, collaboration and debating. This two-week summer school will equip them to take an active role in their schools and wider society, whilst also giving them a flavour of life as a student in Oxford.

Your child will be taught by leading academics and Rhodes Scholars, who will work with prominent national and international speakers to deliver a course based around the UN's Global Goals for Sustainable Development. Bespoke activities will develop their leadership and teamwork skills, building towards a final sustainability conference where they will debate their peers and experience democracy in action.

Additionally, your child will participate in fun and informative excursions, including visits to the Houses of Parliament and the British Museum. They will also gain first-hand knowledge of the Oxford application process from current and former students, along with advice on interviews and personal statements.

## Other Opportunities

Many of our schools around the world offer day and residential summer school programmes designed to help your child develop new skills, meet new friends and make the most of their holidays through fun and challenging activities. Visit our website to find out more about the wide variety of activities your child can enjoy.

# Why choose a Nord Anglia education?

Nord Anglia Education is the world's leading premium schools organisation. We are a global family of schools driven by one unifying philosophy; to be ambitious for our students, our people and our family of schools.

We want every child who attends a Nord Anglia school to achieve more than they may have imagined possible. We do this by ensuring the education our schools offer is second to none. We recruit the finest teachers and leverage our scale as a family to develop unique collaborations with world-leading organisations so that every student learns from the best. This, combined with our personalised approach to learning enhanced with unique global opportunities, equips every student to succeed academically, socially and personally.

Our schools are amongst the most respected international schools in their locations and we are committed to ensuring that they remain the first choice for families around the world.

*Be Ambitious*
