

# THAI SAVE THAI SELF ASSESSMENT

One of the requirements of the Ministry of Public Health is that all students, teachers and school personnel self-assess themselves regularly using the Thai Save Thai App. The frequency of assessment depends on the Epidemic Area the school is situated in. Chonburi is currently in the Maximum and Strict Controlled Area (Dark Red Zone) meaning that assessment should be carried out everyday.

## Notification of Ministry of Education

**RE: Standard for School Reopening under Section 9 of Royal Emergency Decree on Public Administration in Emergency Situations B.E. 2548 (A.D.2005)**

(ISSUE. 32)

### The Principles of Sandbox Safety Zone in Schools

The principles of Sandbox Safety Zone in Schools shall be used to be the guidelines for cut the risks and provide the immunities (3T1V) as follow;

**T: Thai Stop Covid Plus (TSC+)** Schools shall assess themselves their readiness for the start of the semester

**T: Thai Save Thai (TST)** Students, teachers and education personnel shall assess themselves the risk of infections.

**T: Antigen Test Kit (ATK)** Students, teachers and education personnel shall be screened by ATK before entering into schools. There shall be surveillance and random tests.

**V: Vaccine** teachers and education personnel shall be able to get vaccinations more than 85%.

**Table 1 Preventive Measure in School or Educational Institution Classified by Epidemic Areas**

	Epidemic Areas	Preventive Measures	ATK	Vaccine Accessibility	Time Sensitive Targeting (TST)
1	surveillance area (green zone)	1. strictly follow 6 key measures* (DMHT-RC) & 6 additional measures** (SSET-CQ) 2. follow 7 strict measures for educational institution***	-	≥85% of teachers/staffs	1 day/week
2	maximum surveillance area (yellow zone)	measure 1-2	1 time/ 2 weeks	≥85% of teachers/staffs	1 day/week

Normal

27 Oct 2021 Suggest

Score overview Normal You have a normal level of risk and are advised to wear a mask, wash hands, and continuously practice social distancing. You do not need to be quarantined and can go to work normally.

In the case that you have been vaccinated, even though you have a lower level of risk than others, immunity depends on the number of doses, time after the complete injection, and vaccine efficacy. The vaccine can reduce the severity of the disease, but it is still necessary to assess the risks and take precautions against infection for a longer period of time.

In case you have changed the information Choose the button below
