

"Help Keep the Young Hearts Beating"

News Update- June 2017

Case # 14 – Hu Yuxuan

11 Month Old Boy

This baby was referred to us by our team in Nanjing. Hu Yuxuan had already received heart surgery last year, paid for by the family who managed to borrow the full cost from friends and relatives. He now requires a second operation and the family are simply unable to raise enough money for this second very urgent surgery.

Hu Yuxuan is a twin and his brother is healthy. It would be so important for the family to see them grow up together.

The family has 7 members all of them dependent solely on the father's income. The father is a tool setter on a low and irregular income so the family situation is very tough for them.

As the case was urgent, we were able to approve the funds and the baby received the surgery the same day.

This surgery was supported from funds donated by the British School of Guangzhou. Huge thanks to the teachers, parents and students for their consistent support
