Regents EcoFARM Project

**REGENTS INTERNATIONAL SCHOOL
PATTAYA**
A NORD ANGLIA EDUCATION SCHOOL

Be Ambitious

Eco Bricks

Eco bricks are plastic bottles filled with other plastic objects. This makes the bottles quite strong and can be used as chairs, tables and even houses! This helps the environment by reducing the amount of plastic that goes in the ocean and can be used for something to our advantages.

How to make an eco brick

1. Get a bottle and fill it up with unrecyclable plastics
2. Push the plastic down with a stick and fill up more if needed
3. And make sure it is packed tightly

What
can we
make
from
these
eco
bricks?

Examples

Farm wall - vertical garden

Planters

We can make furniture

We can make a wall

We can make a stage for our show

How to make an eco brick

Start collecting and making eco bricks now!

1.75 L bottles

Bring it to your class/tutor group

Teachers – take them to the collection point in facilities opposite the staff carpark please!
