

WATU

The origins of WATU begin in the misty fjords of Norway then travel via the beauty of Florence to the shores of Lake Lemman. This almost mythical journey has involved the raising of Krone, Euros and Swiss Francs for the support of state primary education in Moshi, Tanzania. On a two year cycle, groups of international students from Norway, Italy and now Switzerland have raised funds and applied them on site using their own labour under the supervision of local craftsman.

Money raised by WATU has been matched by the Righ Foundation and these funds have been used to support scholarships for talented Tanzanian students who have little or no means to pay for their continued education. WATU has provided funds to enable hundreds of the very poorest students to receive a regular lunch at school at no cost.

WATU raises funds through regular bake sales, the sale of greeting cards, raffles, the annual 'Silent Auction' (PFA), and WATU student sponsorships. WATU also receives support from School Dances and International Day. WATU has received the ECIS 'Outreach' Award.

In June 2013 a party of senior students from WATU will be travelling to Moshi to continue the refurbishment programme of the Majengo Primary School.
