

BILINGUAL PRESCHOOL FROM 2 YEARS OLD

Since September 2013 Collège du Léman has offered a class for children aged between 2 and 5 years old with a special programme designed for toddlers. Our bilingual Preschool programme ensures that each young child's transition to school is a smooth and happy one.

Aims and objectives

- To foster exploration, curiosity and initiative
- To emphasise language development of the mother tongue as well as a second language
- To promote social interaction
- To build self-esteem and confidence in every child
- To focus on the joy of trying rather than the product of learning
- To develop feelings of autonomy
- To stimulate active expression of imagination

Each child is unique and develops at their own pace. Our mission is to stimulate their wish to grow by encouraging their success and providing a dynamic and fun environment in which they can reach their full potential and feel proud of themselves and of their achievements.

The programme

We teach in English and French. Unlike regular daycare, our academic project requires a regular attendance of the child throughout the week. After having spent 4 years within our preschool section, children are fully prepared to enter into our primary school at the age of 6.
